

কেমনে যাই/Kemne jai

Bangladesh is a very populous country. Every day, many people travel from one place to another place. During this journey, they have to suffer various types of suffering. Someone does not know how to move from one place to another. That's why these idea will do a lot of work for them. How to go from one district to another district, it can be known from this idea. We add some features like District to District service above distance 500 kilometers. Firstly user have to search by starting place and destination place. After every search by starting and destination place they can see total fare, total distance, station name and bus name, division name. But it must be outside 500 kilometers. If it is within 500 kilometers, it cannot be seen .So by this information user can easily go one place to another place .In Admin section, Admin can update and delete information. In future we will work to cover all place of Bangladesh and bring features like Upazila to Upazila service. In future we will add some features in this project. We will add some features like tourist place information, Hotel and restaurant information, mapping system, train route, water routes, air routes.
